IMPROVE AGRO PRODUCTIVITY

*Over 30 Years of Indian
Heritage Diversified
for a Global Future*

ABOUT US

Rishitechtex Limited is a diversified multi-product company with a distinguished presence in India spanning over 30 years. Following our established success in the Woven Sack industry, we expanded with the creation of our "Plastics in Agriculture," division. This division is dedicated to the production of HDPE Knitted fabric, popularly referred to as "Shade Net." Marketed under the highly recognized brand Krishi Net, our product is distributed through a robust network in India and dedicated overseas representatives in Key Global Markets.

AGRICULTURE APPLICATION

Agriculture

Krishi Net's versatile HDPE knitted Shade Net delivers multi-purpose environmental control. In agriculture, it is a superior climate solution, shielding crops from heat, UV rays, wind and dust.

Domestic

In domestic settings, Krishi Net creates comfortable areas by reducing sunlight intensity and heat. Reliable, versatile protection for any environment.

Construction

In construction it functions as effective debris netting and windbreak.

QUALITY ASSURANCE

Our quality focus is absolute. We ensure consistent, superior products through extensive inspection equipment and rigorous oversight by our Quality Assurance Personnel. Our operations are driven by a team of 300 employees, including skilled engineers and technical staff. This commitment to excellence was globally recognized when we received the International Quality Crown Award in London 2024.

TYPES OF SHADE NET

Mono+Mono Shade Net

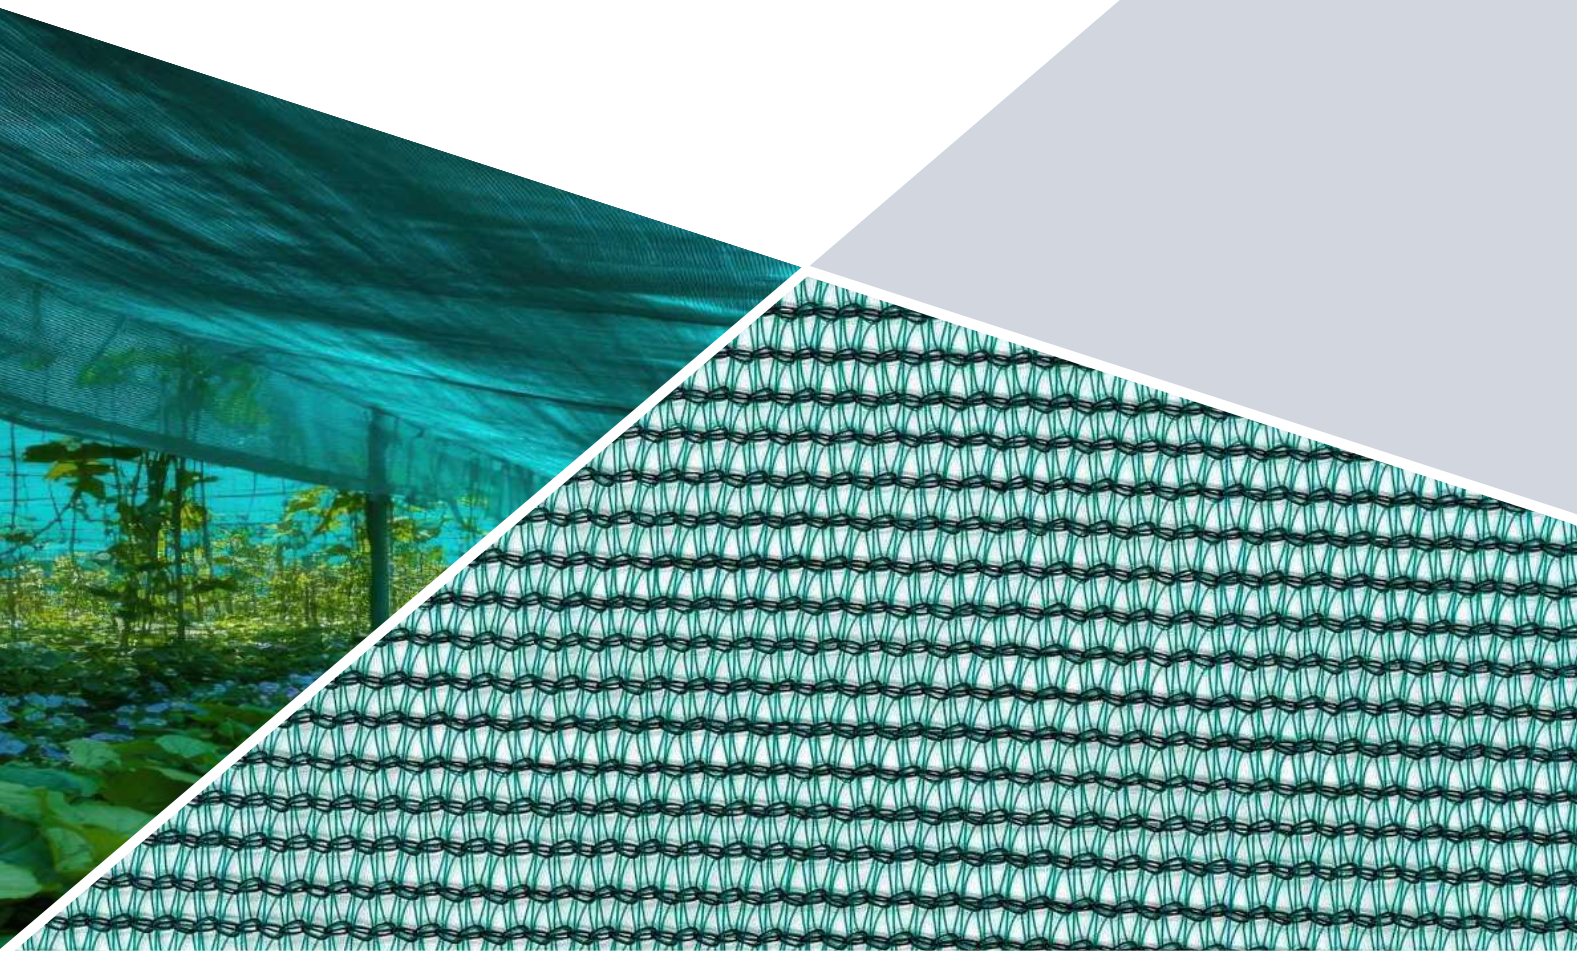

KrishiNet Monofilament Shade Nets introduce superior durability and performance to the industry.

Crafted from premium High Density Polyethylene (HDPE), our nets are engineered to provide maximum utility and longevity:

- **Exceptional Resilience:** Highly resistant to chemicals, high temperatures, and severe UV radiation.
- **Optimal Strength:** The Mono+Mono weave offers judiciously superior tensile strength, critical for structural integrity in demanding applications.
- **Comprehensive Protection:** Provides dual action defense, securing crops against pests and mitigating various extrinsic damages.

THE PROFESSIONAL'S CHOICE FOR:

- Agricultural Polyhouses
- Nurseries
- Construction Safety and Scaffolding

TYPES OF SHADE NET

Tape+Tape Shade Net

Since 1984 KrishiNet has been meeting the demand for high quality HDPE Tape+Tape Shade Nets.

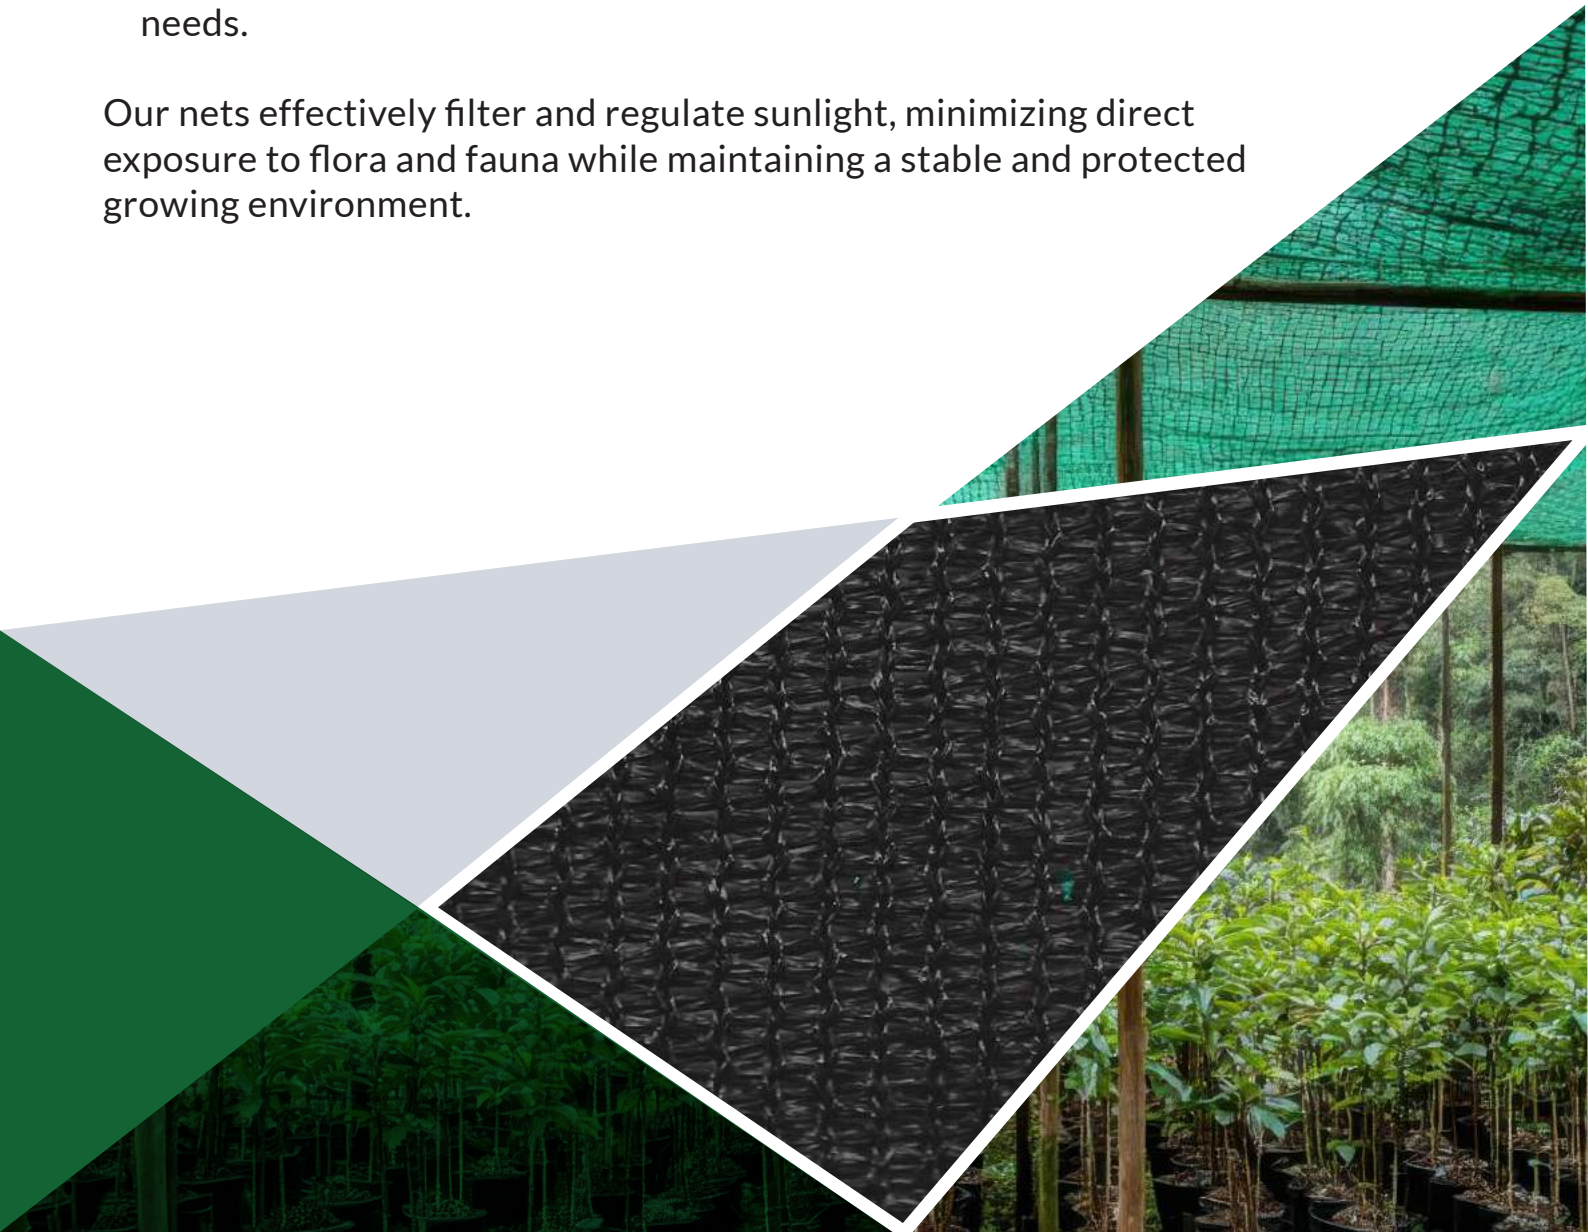

These nets are engineered from premium grade material, ensuring they are robust, lightweight, and inherently resistant to UV radiation.

OPTIMAL CANOPY AND REGULATION

KrishiNet Tape+Tape nets are specifically designed for applications where canopy and shade regulation are prioritized over extreme tensile strength, making them ideal for:

- **Horticulture & Floriculture:** Perfect for creating a placid, protected environment.
- **Agriculture & Construction:** Highly versatile across diverse industry needs.

Our nets effectively filter and regulate sunlight, minimizing direct exposure to flora and fauna while maintaining a stable and protected growing environment.

TYPES OF SHADE NET

Tape+Mono Shade Net

KrishiNet's Hybrid Shade Nets combine the strength of monofilament threads with the shading efficiency of tape yarns, resulting in a design that delivers enhanced durability and optimal performance.

ENGINEERED FOR PERFORMANCE

This innovative hybrid construction ensures both superior strength and flexibility, making it an ideal, long lasting solution:

- **Enhanced Durability:** The combination of monofilament and tape elements yields superior strength and resilience.
- **UV Stabilized:** Inherently UV-resistant, protecting the net from degradation and ensuring a significantly longer service life.

VERSATILE APPLICATIONS

The Tape+Mono netting is perfectly suited for a wide variety of commercial and domestic needs:

- Garden Cover
- Privacy Screening
- Pet/Asset Protection

Available in three effective shade densities: 50%, 70%, and 90%.

PRODUCT SPECIFICATION

	Category:	Tape + Tape, Tape + Mono, Mono + Mono
	Shading:	15% to 90% / 50 to 350 gsm
	UV Stabilized:	Yes
	Gauge:	6 9 12
	Width:	Upto 6.5 Mtrs
	Lenght:	Standard 50 Mtrs, can be customized
	Packaging Type:	Roll & Bale
	Warranty Period:	Standard 3 Yrs / Extended 5 to 7 Yrs

From the Managing Director

Rishi Techtex is over a 30 year old company undergoing strategic rejuvenation.

Our future is built on three pillars:
customization, global presence and focused growth.

- First, we are tailoring our product portfolio, with our R&D team working directly with clients to develop application specific solutions.
- Second, we are strengthening our geographic partnerships to serve customers globally.
- Third, while Agro Tech is our major revenue driver, a sector where we aim to be a knowledge leader, we are identifying five new technical textile verticals for near-term growth.

Our success relies on our **People, Passion and Purpose**. We are dedicated to creating an organization that is nimble yet sure footed in a disruptive world.

I thank all our customers, stakeholders and team members for your trust. We promise to deliver consistent and responsible growth while working to solve tomorrow's challenges today.
